Hodder Cambridge Checkpoint is a comprehensive series that combines a student's book with a write-in workbook, offering numerous learning activities. This helps save time for teachers and students alike, as it provides ready-made homework or extension exercises. The series reinforces key scientific concepts through varied question types, quizzes, and the use of ICT. It also challenges learners with extra practice activities to help them progress. The series is designed for ages 11-14 and builds upon their existing computing skills while introducing new concepts. It includes "Do you remember?" panels to recap and activate prior knowledge, as well as "Challenge yourself!" tasks to introduce more advanced skills. The content is engaging and follows the new Cambridge Lower Secondary Science curriculum framework (0893). To develop learners' subject knowledge and scientific thinking skills, the series provides activities that increase their understanding of topics. It also tests their comprehension with questions designed to develop their thinking and working scientifically skills. This series has been endorsed by Cambridge Assessment International Education and is a market-leading approach that has been used by teachers for over 10 years. The Cambridge Lower Secondary Complete English 8 Student Book is designed to provide a solid foundation for students and help them reach their full potential. It prepares students to progress seamlessly to IGCSE English, covering the entire curriculum. The workbook, also endorsed by Cambridge International, reinforces learning, deepens understanding of key concepts, and provides extra practice and self-assessment. It includes write-in activities to gauge student progress and build confidence ahead of assessments. The Hodder Education series, endorsed by Cambridge Assessment International Education, offers comprehensive science textbooks for students. The Checkpoint Lower Secondary Science Student's Book 8 3rd Edition provides engaging content that aligns with the new Cambridge Lower Secondary Science curriculum framework (0893). It includes activities to develop learners' subject knowledge and scientific skills. The book is designed to help students engage with and understand topics they are studying, with questions testing comprehension of each topic. This series has been endorsed by Cambridge International to support the curriculum framework from 2020. Similarly, the Collins Cambridge Lower Secondary Science Workbook Stage 9 2nd Edition provides comprehensive coverage of the new curriculum framework, including suggested practical investigations and Thinking and Working Scientifically skills. It offers a full range of questions for every topic in the Student's Book, providing regular practice for students to apply and develop their scientific skills. The workbook also includes opportunities for practical activities and analysis, allowing students to develop their scientific skills throughout the course.
